Marvens Barthelemy

MarvensB-05 | LinkedIn | barthelemymarvens@gmail.com | Haverhill, MA

Professional Summary

Computer Science student at the University of Massachusetts Lowell with experience in data analytics, data collection, and data validation. Skilled in Python, SQL, and Excel, with strong analytical and problem-solving abilities. Seeking a Data Analytics internship to support data-driven business decisions.

Education

University of Massachusetts Lowell Lowell, MA

B.S. in Computer Science, Minor in Mathematics
Expected Graduation: May 2027 — GPA: 3.40/4.00

M.S. in Computer Science (Planned)
Expected Graduation: May 2028

Work Experience

Data Analytics Intern Jun 2026 – Sep 2026
A Better Way, PAC Remote
- Partnered with analysts to support data collection, organization, and interpretation for strategic initiatives.
- Reviewed and validated datasets to improve data accuracy and support operational planning.

Data Analytics Intern May 2026 – Jun 2026
A Better Way, Inc. Remote
- Supported polling operations through data collection and analysis of survey and polling information.
- Transformed raw polling data into organized, actionable information to support decision-making.

Fulfillment Associate May 2024 – Present
Amazon North Andover, MA
- Monitored and maintained robotic package distribution systems in a high-volume fulfillment center.
- Troubleshot automated workflows to minimize downtime and maintain operational efficiency.

Computer Literacy and Coding Assistant Sep 2024 – May 2025
Boys & Girls Club of Greater Lowell Lowell, MA
- Taught youth computer literacy, online safety, and introductory coding through interactive activities.
- Guided students through hands-on coding exercises, helping them develop programming fundamentals, logical thinking, and problem-solving skills.

Technical Skills

Programming: Python, SQL, Java, C++
Data Analysis: Data Cleaning, Data Collection, Data Validation, Data Interpretation
Excel: PivotTables, XLOOKUP, Charts, Data Visualization
Tools: Jupyter Notebook, Git, GitHub
Professional: Analytical Thinking, Problem-Solving, Communication, Collaboration

Projects

Math Type Racer Game (In Progress) Sep 2026 – Dec 2026
React, JavaScript, HTML, CSS, Vite
- Collaborating on a team-based educational game featuring timed math practice rounds and interactive gameplay.
- Contributing to frontend development and collaborative version control using Git and GitHub.
- GitHub Repository

Weather Application Sep 2024 – Present
HTML, CSS, JavaScript, OpenWeatherMap API
- Developed a responsive dashboard displaying live weather data, including temperature, humidity, and wind speed.
- Integrated API data retrieval, input validation, and error handling.

N-Body Solar System Simulation Apr 2024 – May 2024
C++
- Developed a physics-based simulation using an N-body algorithm to model gravitational interactions and planetary motion.
